

Microlot

Microlot is a limited edition cocoa of a unique quality harvested from the wild, the plantations lost among the jungles of Latin America. The unique terroir and the conditions of collection, fermentation and drying determines exceptional features, the taste and aroma of such cocoa. Micro lots are presented on the market in a limited number, from just one to several bags. Repeating such lots, in most cases, is not possible. Ideal for producing limited collections of chocolates using the "Bean to Bar" technology.
